

Please add any other comments. For instance was there any major topic you felt was omitted, or area of astronomy you still feel completely baffled about, that you think we should have covered?

That's one of the things that amazed me & understood most of it.

Course has increased my interest and knowledge

Will definitely get involved when and as soon as I can

Worth waiting the year to attend ~~was~~ enjoyed it and felt comfortable

Thanks for info.

TALK DURATION ABOUT RIGHT BUT COURSE WOULD BE LONGER THAN FOUR WEEKS TO COVER SOME SUBJECT MATTER IN MORE DEPTH.

I THINK TALKS 1/2/3 WOULD BE EXPANDED TO COVER TWO SESSIONS  $\frac{1}{2}$  TO COVER FUNDAMENTALS IN A LITTLE MORE DETAIL

Thanks for your time

WOULD HAVE LIKED THE OPPORTUNITY TO HAVE GONE OUTSIDE  
AND VIEWED MORE BUT THE SKIES CAN'T BE CONTROLLED.  
I HAVE ENJOYED YOUR ENTHUSIASM.

Thanks for your time

Really enjoyed the talks - occasionally a bit too  
technical for me - but that didn't affect my  
enjoyment. Thank you.

Thanks for your time

I found the course very interesting.

I would have quite liked a comprehensive "things to look out for" leaflet or something similar.

Thank you.

Thanks for your time

For instance was there any major topic you felt was omitted, or area of astronomy you still feel completely baffled about, that you think we should have covered?

I found the course informative and entertaining.  
Mostly the information was at a level easy to understand but my knowledge of photography is slight so the astrophotography was tricky / too difficult for me personally.

Thanks for your time

We both really enjoyed the evenings and talks.  
Everything has been explained in easy to understand language.

Thanks for your time
